

CLAIMS

1. An activated foam made of a natural or synthetic rubber or a synthetic resin, wherein said foam contains a zirconium compound and/or a germanium compound, and has a closed-cell structure, and further wherein said foam is used so as to directly or indirectly contact with a human body when a pharmaceutical agent is administered.
2. An activated foam made of a natural or synthetic rubber or a synthetic resin, wherein said foam contains a zirconium compound and/or a germanium compound and carbon, and has a closed-cell structure, and further wherein said foam is used so as to directly or indirectly contact with a human body when a pharmaceutical agent is administered.
3. The activated foam according to claim 1 or 2, wherein said pharmaceutical agent is an anti-cancer agent.
4. The activated foam according to claim 3, wherein said pharmaceutical agent is a human-derived anticarcinogenic substance.
5. The activated foam according to claim 4, wherein said human-derived anticarcinogenic substance is an inhibitor of histone deacetylase (HDACI).
6. The activated foam according to any of claims 1 to 5, wherein said cell is formed at 20 to 30 cells/mm².
